By providing a range of community based support activities and services, we aim to increase self-esteem and opportunity in an area of multiple deprivation. These services include working with families and individuals, providing information and advice (e.g. Scottish Refugee Council advice outreach for asylum seekers and refugees), health services (e.g. access to smoking cessation), education services (e.g. ESOL classes), leisure opportunities, and a community cafe and nearly new shop. We do this as much as possible in partnership with other agencies and with the quality assistance of experienced volunteers.
